

SAMUEL DIAZ

SOFTWARE ENGINEER

(619) 366-6699 | samdiaz4400@gmail.com | San Diego, CA (Open To Remote Work)

PROFESSIONAL EXPERIENCE

Software Engineer – Ship Self Defense System (SSDS) May 2023 – Present
Programs Management Analytics and Technologies (PMAT), Inc. – San Diego, CA [Hybrid]

- Engineered advanced software solutions for DoD naval platforms, with a focus on the Ship Self Defense System (SSDS).
- Key contributor in a team, delivering three major software releases with a 95% on-time delivery rate across all projects.
- Adapted to new technologies under strict deadlines to meet PMAT's evolving needs, reducing development time by 15%.
- Identified, documented, troubleshoot, and resolved 15+ intricate bugs, significantly improving system performance.
- Managed 15+ complex code merges and ensured quality through rigorous testing, achieving a 95% conflict resolution rate.

Relevant Skills: Agile/Scrum, Software Development, Version Control, Code Merges and Integration, Technical Documentation, Software Quality Assurance, Software Development Lifecycle, Unit & Integration Testing, Software Debugging, Peer Code Reviews

TECHNICAL SKILLS

Languages: Python, Java, C++, R, HTML, CSS, JavaScript, SQL, SAS, PHP
Libraries & Frameworks: requests, scikit-learn, nltk, mysql-connector/J, JavaFX, jQuery, Ajax, Angular, XML, JSON, APIs, DOM
Software Tools & Platforms: Linux, Git, Jira, Docker, Agile/SCRUM, Jenkins (CI/CD), AWS, Tableau

EDUCATION

Master of Science (MS), Information Systems – San Diego State University, San Diego, CA 2026
Bachelor of Science (BS), Computer Science – Western Governors University, Salt Lake City, UT 2024
Bachelor of Science in Business Administration (BSBA), Information Systems – San Diego State University, San Diego, CA 2022

CERTIFICATIONS

Data Science Advanced Graduate Certificate – San Diego State University 2026
Linux Essentials – Linux Professional Institute 2024
CompTIA Security+ – Computing Technology Industry Association 2024

PROJECTS

 **Package Delivery Algorithm** | Combinatorial Optimization

- Designed a system using the nearest neighbor algorithm for route optimization.
- Implemented a hash table in Python for efficient package management, ensuring timely deliveries and supporting scalability.

Relevant Skills: Algorithm Design & Optimization, Data Structures, Time Complexity, Data Parsing, Computational Scalability

 **Cloud Hosted Personal Website** | Cloud Computing & Security

- Designed, developed, and deployed a personal website using AWS services while maintaining cost efficiency.
- Implemented cloud security best practices, including IAM roles, encryption, CloudTrail logging, and data lifecycle management.

Relevant Skills: Cloud Computing, Cloud Architecture & Security, Website Hosting, IaaS, Web Development, Logging & Monitoring

 **Appointment Scheduler** | Data Management Systems

- Managed customers and appointments through an interactive UI that connects to the business database.
- Implemented exception controls, time zone adjustments, and activity tracking; generated detailed reports.

Relevant Skills: Full Stack Development, Database Design and Management, Applications Development, UI/UX design, OOP/OOD
