TECHNICAL SKILLS

Programming: Python, Java, SQL, JavaScript, C++, R, Bash, HTML, CSS, C#

Development: AI/ML, APIs, Agile, Docker, Git, GitLab, .NET, Jira, Confluence, VS Code, Jenkins CI/CD, SDLC, Postman

Data Science: Excel, Matplotlib, MySQL Workbench, Pandas, RStudio, NumPy, PyTorch, Scikit-learn

Cloud & Platforms: AWS, Google Cloud, macOS, RHEL 8, Ubuntu, Windows

Systems Engineering: Systems Architecture, Network and Data Flow Diagrams, Requirements Analysis, Configuration Management, System Integration Laboratory (SIL), Technical Writing

Cybersecurity: RMF, ATO, eMASS, NIST SP 800-53, NIST SP 800-171, CMMC Level 2, DoD STIGs, SSPs, Governance

WORK EXPERIENCE

Programs Management Analytics & Technologies (PMAT) San Diego, CA (Hybrid)

Information Systems Security Officer (ISSO)

Mar 2026 – Present

Enterprise Cybersecurity

- Supported enterprise CMMC Level 2 compliance efforts across multiple departments.
- Developed 5 network and data flow diagrams documenting enterprise system boundaries and CUI data flows.
- Revised 14 organizational cybersecurity policies to align with NIST SP 800-171 and strengthen governance.
- Participated in a five day long third-party mock assessment to support enterprise CMMC compliance readiness.

Ship Self Defense System (SSDS) Program

- Supported RMF implementation and continuous monitoring across the Ship Self Defense System (SSDS).
- Conducted 300+ security control assessments across multiple review cycles to ensure DoD compliance.
- Identified, documented, and coordinated remediation of 20+ critical deficiencies to maintain security posture.
- Revised and maintained program policies, procedures, and artifacts supporting NIST SP 800-53 compliance.

Integrated Missions Branch (IMB) Program

- Presented recommendations to stakeholders to improve security systems, processes, and controls.
- Assessed AWS environment security controls, and provided findings and remediation recommendations.
- Develop security artifacts and evidence to support security control implementation and compliance.
- Developed network and data flow diagrams documenting CUI flows across the AWS environment.

Software Engineer

May 2023 – Mar 2026

Ship Self Defense System (SSDS) Program

- Maintained and enhanced combat system software for the Navy's Ship Self Defense System (SSDS) program.
- Resolved 20+ software defects through code analysis, debugging, and trouble report investigation.
- Integrated 30+ code merges across multiple software baselines to support production releases.
- Supported software integration, testing, and troubleshooting within a System Integration Laboratory (SIL).
- Collaborated with systems, software, and security engineers within an Agile development environment.

EDUCATION

MS, Information Systems – San Diego State University (Expected) 2026

Graduate Certificate in Data Science

2025

BS, Computer Science – Western Governors University

2024

BSBA, Information Systems – San Diego State University

2022

CERTIFICATIONS

Google Cloud Computing Foundations – Google Cloud

2025

CompTIA Security+ – CompTIA

2024

Linux Essentials Certificate – Linux Professional Institute

2024

PROJECTS

AWS Secure Portfolio Website | *AWS, JavaScript, HTML/CSS, IAM, Route 53, CloudTrail, S3, KMS, CloudFront*

- Designed and deployed a secure AWS portfolio website using Amazon S3, CloudFront, and Route 53.
- Implemented least privileged IAM roles, MFA, and CloudTrail logging to strengthen account security and auditing.
- Implemented Amazon S3 versioning and lifecycle policies to support data recovery while minimizing storage costs.
